

Helium Warnings

- **Keep out of the reach of children.**
- **Balloons represent a possible choking hazard.** Children under eight years can choke or suffocate on uninflated or broken balloons. Adult supervision is required. Keep uninflated balloons away from children. Discard broken balloons immediately.
- **Do not place nozzle in mouth or nose for any reason.** Doing so can damage lungs and other body parts, which can result in serious personal injury or death. The cylinder contains compressed helium under pressure.
- **Do not inhale helium. Use only in a well ventilated area. Never use in closed spaces.** Helium reduces and can eliminate oxygen available for breathing. Inhaling helium can result in serious personal injury or death.
- **Do not refill with any material.** This is a non-refillable cylinder. This could result in violent bursting of the cylinder resulting in serious personal injury or death.
- **Do not store in damp areas.** This can cause the cylinder to rust. Rusting of the cylinder can result in a violent bursting of the cylinder resulting in serious personal injury or death.
- **Never expose the cylinder to direct heat or fire.** Exposure to those conditions could result in the operation of the pressure relief device, which will result in a sudden discharge of pressure from the cylinder, resulting in serious personal injury or death.
- **Do not mistreat the tank by dropping on sharp or pointed surfaces.** This could puncture the tank causing a sudden release of the contents resulting in serious injury or death.
